

Raspberry PI for Networking Projects

RM21.00

ISBN : 978-967-0257-97-6

Authors : Norharyati Harum, Nurul Azma Zakaria, Mazwir Abdul Manan

This book provides an introduction to develop networking projects with microprocessor Raspberry Pi. Basic knowledge in Linux operating system and Python programming language would be useful but not mandatory. All chapters begin with an example of a project illustrating the use of a Raspberry Pi in the work which will give benefits to those who are interested in building a Raspberry Pi related projects. Topics consist of both theoretical and practical aspects but emphasis is more on the practical of how to do the projects. The focus is always on what a beginner user might need to know at that point. It will be a good exposure for primary and secondary school student or even college or university students.
